Buffalo Commercial.—Dr. Briggs is the suildest and most conservative "herete" ever put on trial. If there is not room for bim in the Presbyterian Church he Presbyterian Church in America must either divide or consent to have the lights turned out and remain a seventeenthe century theological antiquarian society. The world will pass on and leave it. If the conservatives push the matter to the conclusion toward which they are headed, the result will be a triumph for Princeton, the proud fortress of orthodox, and the discombiture of nearly every younger and more contemporaneous Presbyterian seminary in the United States. Sooner or later there will necessarily be a change. The old boitles, however stout, cannot always hold in the new wine. For religion is a progressive science, in spite of Elder McDougall of Cincinnati.

FOR some time we have been running steamers from San Francisco to Australia. We did not pay them any subsidy, but they received some aid in Australia. These steamers built up a commerce which was worth about \$20,000,000 to us. The other day a line to Australia was started, sailing from Vancouver, the Western edd of the Canadian Pacific, and ealing at the Sandwich Islands. It is to have a subsidy of \$125,000 per annum from the British Government and will indoubtedly also receive the aid now given to the American line, and the American line, which cannot expect any aid from this Administration, will as undoubtedly be driven off the occas. This is what the advocates of British commercial supremenced all allowing the saws of trade to prevail. Sometimes they call it the natural order of things. Under this arrangement our mails will go to Yanouver on their way to Australia, and our freight will follow the same course. In a little time will lose a great part of our traile of \$20,00,000, which is dependent on convenient transportation. We will in so lose all chance of securing the Sandwich Lofands, When all of this is lost our friends in sympathy with England will talk of the Inexorable laws of trade and seribe the loss to the effects of our Tarill.
